

Buying Annual Ryegrass Seed for Cover Crops

Your local seed supplier may be a reliable source of quality information for cover crop seeds. But it's always wise to know the right questions to ask before you buy.

Of the many varieties of annual ryegrass, only a handful have been tested in the Midwest and are suitable for cover crop use in corn and soybean production. Other varieties lack cold tolerance and are not recommended for Midwest conditions.

For the best shot at success with your cover crop, make sure that your supplier provides good information and seed with a history of testing and successful use on Midwest farms.

SEED FROM THE OREGON SOURCE

Oregon is the leading producer of annual ryegrass seed in North America. Below are companies that produce or handle varieties of annual ryegrass that have been tested for use in the Midwest.

If you click on the following website links, you'll find more information about growing annual ryegrass, as well as where to find seed in your area.
